How to Measure for a Wig

Phone: 707 763 1978 • FAX: 707 763 1978 • Email: information@wigboys.com

Prep head as though you were going to wear a wig. Using a cloth measuring tape, like wardrobe people use, measure head carefully as shown below.

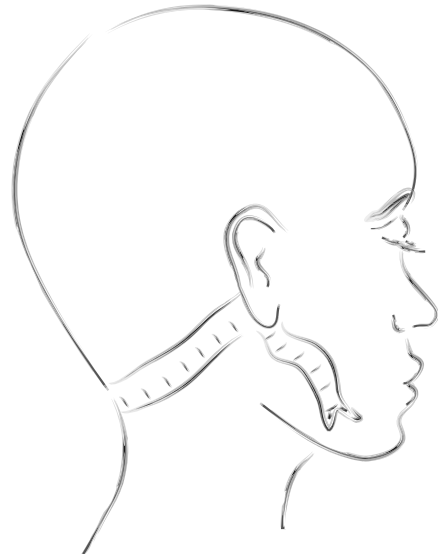

"A" This measurement is the circumference of the hairline, under the occipital bone at the back of the head.

"B" This measurement is of the hairline, from where your hair starts in the front across the top of the head to the back nap.

"C" This measurement is from the top of one ear to the other, across the top of the head.

"D" This measurement is of the width of the nape, side to side at the nape line.
