## How to Measure for a Wig

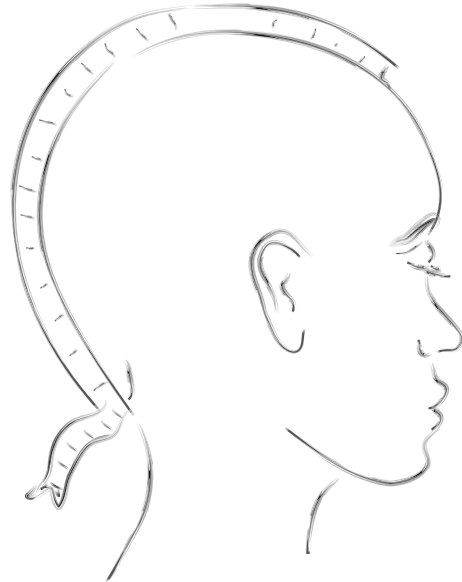

Phone: 707 763 1978 • FAX: 707 981 7844 • Email: [information@wigboys.com](mailto:information@wigboys.com)

---

Prep head as though you were going to wear a wig. Using a cloth measuring tape, like wardrobe people use, measure head carefully as shown below.

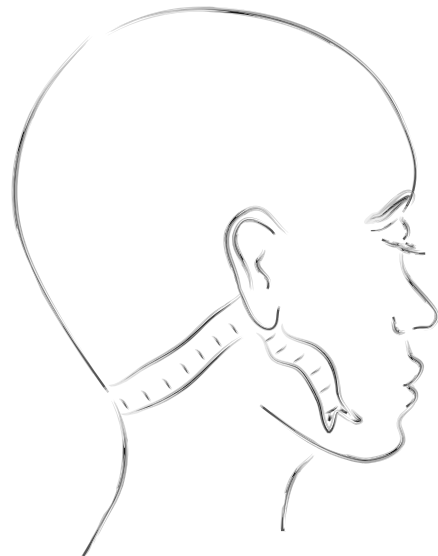

**"A"** This measurement is the circumference of the hairline, under the occipital bone at the back of the head.

**"B"** This measurement is of the hairline, from where your hair starts in the front across the top of the head to the back nap.

**"C"** This measurement is from the top of one ear to the other, across the top of the head.

**"D"** This measurement is of the width of the nape, side to side at the nape line.
